## Summary

I'm a MERN Stack Developer with over 2 years of hands-on experience in building responsive and user-friendly web applications. I specialize in front-end technologies like HTML5, CSS3, JavaScript, React.js, and Tailwind CSS, and I'm also skilled in backend tools such as Node.js, Express.js, and MongoDB. I enjoy creating clean, scalable solutions that offer a smooth experience for users and help businesses grow.

## Certifications

- Google developer student club Certified.
- Hunarmand Kamyab Jawan Program Certified.

---

## Academic Projects

---

### **Final Year Project: Solarbaraz (Multi-vendor):**

- SolarBazar is a MERN stack-based multi-vendor e-commerce platform for buying and selling solar products. It features vendor registration, admin approval, product management, user authentication, shopping cart, and secure checkout. Built with a focus on scalability, performance, and a smooth user experience.

### **Project: Admin Panel (Dashboard):**

- A general-purpose frontend dashboard built with Next.js, React.js, Tailwind CSS, and MUI. It features user stats, navigation sidebar, and interactive UI components, focused on a clean, responsive design ready for backend integration.

### **Portfolio Website Project:**

- I built a personal portfolio website using React.js, Tailwind CSS, and Framer Motion. It showcases my skills, experience, and featured projects in a clean, responsive layout. The site includes smooth animations and links to my GitHub.

### **Front-end Developer : Landing Page , Freelance (fiverr)**

- I developed a responsive landing page for a Fiverr client using HTML5, CSS3, Tailwind CSS, and JavaScript, focusing on clean design and performance.
- The final layout was pixel-perfect, mobile-friendly, and matched the client's brand requirements.
